

Difference Between Hazard and Risk (Infographic)

Last Updated : 01 March 2017

This infographic will help you understand the difference between hazard and risk, two terms that are often incorrectly used as synonyms. A hazard is something that has the potential to cause harm while risk is the likelihood of harm taking place, based on exposure to that hazard.

HAZARD VS. RISK

HAZARD

is the potential to cause harm

when crossing a road, cars are a hazard

RISK

is the likelihood of harm taking place

when crossing a highway, the risk of an accident is high

when crossing a country road, the risk of an accident is low

HAZARD

in foods can be...

physical
for instance pieces of bones in fish products

biological
for instance harmful bacteria, viruses or parasites

chemical
for instance mercury in fish or acrylamide in starchy food

RISK

is determined by the exposure...

how much

how long

how often

...to a hazard

Example: Salmonella in egg is a hazard

if eaten raw

the chance of exposure is high

the risk of food poisoning is high

correct food handling
for instance cooking thoroughly kills Salmonella bacteria

the chance of exposure is low

the risk of food poisoning is low
